

Ball-end thrust screws without head stainless steel with flattened ball and rotation lock

Item description/product images

Description

Material:

Screw and ball stainless steel.

Version:

Stainless steel bright.

Note:

Surfaces which are not flat and parallel can be firmly clamped or supported with a flattened ball, the movable ball can adapt itself up to 9°.

Longer versions have been designed especially to be glued in. This enables mechanical connecting elements with male thread to be made cost-effectively for small and medium-sized series.
